

# Creativity

## ONE PERSPECTIVE

*Think of what you daily see, hear, or read about, along with the ideas they represent, as pieces of a jigsaw puzzle. A creative person takes these pieces, selects some of them, and sees new, interesting, and useful ways they can fit together.*

*This process is the essence of some of mankind's greatest achievements, not just in the arts (e.g. novels, paintings, music) but also in the sciences (e.g. physics, medicine, psychology, architecture).*
