

CHRISTIANITY and LIGHT SPEED

Assumption

The universe of things and ideas was created by the Biblical God.

Fact

Light travels at 186,300 miles each and every second.

Implication

Humans are so separated from other intelligent lives by time and space that communication is virtually impossible.

Conclusion

Earth is for all practical purposes self-contained. Its history is essentially unique.

Speculations

It's not inconceivable that the Christian story has played out on every other planet with intelligent life, and Christ is the central figure in each. How many immaculate conceptions, nativities, crucifixions, burials, resurrections, or judgment days? Happening now? The future?

The facts of Christianity and the possibility of intelligent life on other planets are consistent.

God created light to separate and compartmentalize, so the Grand Story could be meaningfully recreated innumerable times in His universe.

And God said, "Let there be light."

Genesis 1:3
