

PHILOSOPHY AND SOPHISTRY

Philosophy offers a soaring intellectual experience. Consider these questions

What is beauty? (Aesthetics)

How can we really know anything? (Epistemology)

What is the good? (Ethics)

What rules govern thought? (Logic)

What is ultimately real? (Metaphysics)

However, Sophists use language to distort and deceive for their own aggrandisement. In other words, one of the most beautiful quests the human mind can experience is not immune from bullshit!
