

# DO DEMOCRACY AND CAPITALISM IMPLY THEIR OWN DESTRUCTION?

*To what extent:*

1. does democracy provide the freedom to innovate?
2. does democracy provide the incentive to innovate?
3. does innovation generate more powerful technologies?
4. do these technologies (chemical, biological, nuclear, electronic) inevitably become globally destructive?
5. is totalitarian global government, along with abolition of national sovereignty, required to control these technologies?
6. do democracy and capitalism therefore contain seeds of their own destruction?
