

WHAT CAN BE KNOWN?

HAS THERE EVER BEEN A MOMENT IN SCIENCE WHEN A QUESTION MADE THE TRANSFORMATION FROM UNKNOWABLE TO KNOWN? IF THIS HAS HAPPENED AT LEAST ONCE, MAYBE OTHER QUESTIONS CAN BECOME KNOWN. FOR EXAMPLE, CAN WE SIMULTANEOUSLY KNOW BOTH THE POSITION AND VELOCITY OF AN ELECTRON?

THERE ARE OTHER QUESTIONS WE INTUITIVELY BELIEVE CANNOT BE KNOWN BY THE HUMAN MIND BECAUSE THEY ARE INCONCEIVABLE. FOR EXAMPLE, WHAT ARE THE ORIGINS OF MATTER, ENERGY, AND TIME? FURTHER, WHY IS THERE SOMETHING RATHER THAN NOTHING? AND ULTIMATELY, IS THERE A GOD, AND IF SO, WHAT IS HIS NATURE? QUESTIONS LIKE THESE SEEM TO BE IN A DIFFERENT CATEGORY ALTOGETHER.
