

Trans-Pets

GENDER IS IMAGINARY

If you have a pet, you may want to use one or both of our general services. Proudly using our state-of-the-art techniques in excision and augmentation, both boy-to-girl and girl-to-boy divisions specialize in conversion to any gender to can imagine for your precious non-human companion.

For a limited time, have him or her try a gender out. If he or her looks maladaptive, just use our patented reversal and recovery service at a discounted price.

Flash! We're expanding soon. Currently under development is our new **TransPhylem** project. When it comes to the natural order, there is no limit to our perverse *renaturalizations*.
